Department of Economics, New York University, 19 W 4th St, New York, NY 10012

+1 (845) 706-9973 • n.linh@nyu.edu • <https://dlinh-n.github.io/>

EDUCATION

New York University, Graduate School of Arts and Science New York, NY
 Doctor of Philosophy in Economics, Henry M. MacCracken Fellowship, CGPA: 3.72 *Aug 2020 – May 2026 (Expected)*
Columbia University, School of Engineering and Applied Science New York, NY
 Bachelor of Science in Applied Mathematics, Magna Cum Laude, CGPA: 3.85 *May 2015*
Bard College Annandale-on-Hudson, NY
 Bachelor of Arts in Economics, Levy Economics Scholarship, CGPA: 3.92 *May 2015*

RELEVANT TRAINING: applied econometrics; machine learning; demand & supply model design, estimation, simulation

WORK EXPERIENCE

NERA Economic Consulting, Antitrust & Competition New York, NY
Senior Analyst, Analyst, Associate Analyst, Research Associate; Intern *Jul 2015 – Jul 2020; Jul – Aug 2014*

- Implemented economic models for assessing competitive effects of mergers and acquisitions, and estimated harm resulting from alleged anticompetitive conduct in antitrust litigation cases in SAS, R, Stata, and MATLAB
- Processed, joined, standardized, and analyzed large-scale structured and unstructured public/proprietary datasets; data frequently exceeded 10 million observations and reached up to 12 billion in the case of consumer loan servicing
- Drafted sections of expert reports and prepared technical materials for submission to the FTC, DOJ, and EC
- Managed research teams of 2 to 10 analysts; developed and delivered technical training presentations

RESEARCH EXPERIENCE

New York University, Department of Economics New York, NY
PhD Student, Dissertation *May 2023 –*

- Studied theoretically and empirically the equilibrium implications of open banking in credit markets
- Built a novel mortgage search dataset by merging information from multiple high-volume data sources on borrower applications, loan terms, ex-post delinquency, and lender identity along the search path
- Used event study panel data methods to exploit the entry of an industry-led interoperable network and document new descriptive evidence on the influence of consumer data sharing on mortgage originations, pricing, and default
- Designed an econometric framework of binary-type borrower search and lender pricing, estimated the model, and compared social, consumer, as well as producer welfare under counterfactual data interoperability regimes

Co-author with PhD Students A. Berman and N. Hickok (MIT) *Jul 2023 –*

- Explored the cost effectiveness and adoption consequences of new and second-hand purchase subsidies for electric cars
- Developed a dynamic model of the vehicle market with endogenous forward-looking consumer replacement decisions; calibrated the model using millions of Texas car registrations to analyze equilibria under alternative subsidy designs

Co-author with Profs. J.E. Humphries (Yale), S. Nelson (Chicago), W. van Dijk (Yale), D. Waldinger (NYU) *Jun 2022 –*

- Investigated the main drivers of rental evictions using uniquely collected lease-level property management ledger data
- Designed, estimated, and analyzed a model of landlord eviction choice to evaluate the scope for commonly-proposed policy instruments to create additional tenant forbearance and reduce landlord evictions

Columbia University, Department of Economics New York, NY
Co-author with Profs. P.A. Chiappori and B. Salanié (Columbia) *May 2015 – Jun 2019*

- Examined estimation bias in one-to-one bipartite matching models when relaxing a standard separability assumption
- Designed and built a simulation framework in R for samples of a few hundred individuals with varying characteristics and matching preferences; utilized the Gurobi optimization software to solve for stable matching outcomes

SKILLS

Languages: Native Bilingual: Vietnamese, Polish; Fluent: English

Computer: Advanced: Python, R, MATLAB, SAS, Microsoft Office; Intermediate: Julia, L^AT_EX; Basic: Stata

WORKING PAPERS

Nonpayment and Eviction in the Rental Housing Market (with J.E. Humphries, S. Nelson, W. van Dijk, and D. Waldinger). November 2024. Submitted. [PDF]
Matching with Random Components: Simulations (with P.A. Chiappori and B. Salanié). December 2019. [PDF]

WORK IN PROGRESS

The Distributional Effects of Data Interoperability: Evidence from the U.S. Residential Mortgage Market
Copyrights and Product Variety: Evidence from the Golden Age of Hip Hop
Out with the Old, In with the New: Equity and Efficiency of Secondary-Market Subsidies for Electric Vehicles (with A. Berman and N. Hickok)
